

# Indiegogo Success Oomi Smart Home Named 2017 CES Innovation Award Honoree

---

**Chicago, Illinois January 6, 2017**

Just a few days before the 2017 CES took place in Las Vegas, [Indiegogo](#) success [Oomi Smart Home](#) announced it was named an innovation award honoree of the event. The CES Innovation Awards are notably sponsored by the Consumer Technology Association (CTA)TM, the producer of this years' event. Products entered in the award competition are judged by a panel of judges that consists of industrial designers, independent engineers, and members of the trade media.

[As previously reported](#), Oomi offers users the ability to simply control and monitor their home's lighting, ambiance, air quality, security, entertainment streaming and much more all from one sleek remote, the Oomi Touch. The product has continuously built with technology and patent pending features that not only ensure easy set-up of all its accessories; it also allows integration of other smart home devices. Fathem, the creator of Oomi Smart Home, successfully secured \$1,790,511 during its time on Indiegogo in 2015.

Colin Marshall, Vice President at Fantem, stated:

"When we embarked on this journey to create Oomi we were driven by the notion that the smart home wasn't smart unless it was made for everyone. We knew that status quo wasn't going to move the needle; we would have

to do something completely different. To be selected again as an honoree, along with some of the most innovative consumer technologies, is a wonderful testament to our efforts and we can't wait to finally share Oomi with everyone."

Meanwhile, Oomi is currently shipping to the backers of its Indiegogo campaign and will begin taking preorders in February, with delivery late Spring 2017.

### About Fantem

Fantem is focused on enhancing people's lives through the development of innovative lifestyle products and solutions. From simplifying the smart home to creating the first ever 3D lens for action cameras, Fantem is re-imagining the technologies that make life more enjoyable. In 2014, Fantem began a mission to remove the complexity and frustration associated with smart home systems and technologies. Through thoughtful consideration of consumer goals, Fantem re-imagined the experience from the ground up. The result is Oomi, the easiest and most approachable smart home system available anywhere - "a system designed for the rest of us!" Now anyone can have a smart home, regardless of their comfort level with technology. For more information, please visit <http://www.oomi.com>, and follow us on [Facebook](#) and Twitter [@oomihome](#). Fantem has offices in Chicago and Shenzhen and strategic partners in four continents.
